# HOW TO CONNECT YOUR HEATER VIA BLUETOOTH

Before connecting your radiator to your device, you will need to download the free Harmoni App. Once downloaded, sign in to your existing account or create a new account.

## Step 1

After you have signed into the app, add a zone in which the radiator will be.

If you have just created an account, it will prompt you to do this but if you are already signed in you will need to click the plus button [+] on the homepage.

## Step 2

Once the zone has been named and located, click 'Add a product' and select RADIATOR.

## GO TO HEATER

### Step 3

To put the unit into pairing mode:

On the radiator press SETTINGS

With the arrows, go to WIFI and press the POWER button to select

Using the arrows again go to LINK DEVICE and press the POWER button to select

The screen will go blank for a few seconds and then a network will appear (IRT...)

## Step 4

The phone will now go into 'activating link mode'.

Click CONTINUE on the app.

## Step 5

The app will now scan for products.

Once found, the IRT code will appear on your phone.

## Step 6

Click the corresponding code to the one displayed on the radiator.

Then press the power button on the unit to accept the pair.

## Step 7

From the list of networks on your phone, select your home 2.4GHz network and click CONNECT.

## Step 8

When prompted, enter your home WiFi password and select OK.

## Step 9

The app will go through the next process and the radiator will reboot.

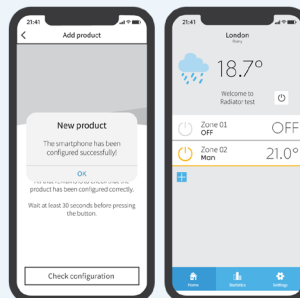

## Step 10

Once this shows on the temperature screen, ensure that at least 1 of the WiFi bars are SOLID WHITE.

## Step 11

Once at least one bar is solid, click on CHECK PRODUCT CONFIGURATION on the app.

## Step 12

The app should then confirm that the configuration was successful and the unit is paired.

## CONTACT DETAILS

If you have any questions please call our helpline on 01473 559088

## GET THE HARMONI BROCHURE
