

Designer CONSERVATORY

1200w

The all-year-round heating solution for conservatories and garden rooms

Haverland Conservatory radiators are specifically designed to provide efficient heating in conservatories and garden rooms, including those with 'dwarf' walls.

The specification features two programmable settings controlled by a built-in electronic thermostat. The control panel is positioned upwards to enable the user to easily set the temperature and the operating mode.

Summary of main features

- Designed for low level 'dwarf' walls
- Durable construction
- Easy and quick to install
- LCD electronic thermostat with timer function
- Weekly temperature programming
- Thermo-dynamic inertia media
